

# OS

Edition: Windows 10 Home Single Language

Version: 20H2

## Install python 3.8.6

<https://www.python.org/downloads/release/python-386/>

## Install selenium 3.141.0

<https://pypi.org/project/selenium/>

- Copy the command at the page
- navigate to your preferred directory
- paste your command in the terminal and execute `[pip install selenium]`

## Webdriver - Chrome

- open your Chrome web browser
- "*customize and control Google chrome*" navigate to "*help*" and select "*About Google Chrome*"
- make note of the your Chrome version
- check for a webdriver for your specific browser version
- Accordingly download the zip package that has an exe file.
- Extract the zip package
- Make a note of the file path. (file:*chromedriver.exe*)

## The Applications Working

Figure 1 is a screen shot of the selenium based project using the React App.

Figure 1.1 is a screen shot of the output on the terminal after executing the selenium script.
